

FrontierAI RAG Test Document

FrontierAI is a local AI orchestration platform designed to coordinate models, memory, tools, retrieval, specialists, and verification.

The Model Router selects an appropriate processing path based on task intent, complexity, reasoning requirements, and tool requirements.

The Knowledge Retrieval system stores documents, splits them into smaller chunks, and retrieves relevant information for a user query.

The specialist layer contains coding, research, mathematics, and general specialists that can use the Model Gateway and Qwen3.

This document is intentionally created for testing PDF ingestion.
The secret test phrase is: ORBIT-84721.
